## Asus Zenbook Pro Duo OLED

Asus takes dual display laptops to the next level with the Zenbook Pro Duo OLED, sporting a 14.5" 2.8K 120Hz OLED display with an additional 2nd display. Once the device is fired up, the incredible dual display lets you view the primary screen with a 100% DCI-P3 colour gamut and 550 nits of brightness for incredible images/video. The secondary display is a 12.7" filling touchscreen with a similar colour gamut and brightness, as well as stylus support. The 12th Gen Intel Core i9 processors bring everything to your hands - speed, productivity, multi-tasking and extreme audio visuals. Dolby Atmos lets you hear clearer and louder while Dolby Vision ensures splendid imagery. This is a great device if you're a professional, into digital arts or require simultaneous multiple screen work. [asus.com/flipkart.com](https://www.asus.com/flipkart.com)

## OnePlus 18W Phone cooler

OnePlus has a super unique and super useful device in the form of a Phone cooler (PCW02). Engineered for mobile gamers, this is the first time I've ever tried such a device and the results were great. I'm not an avid gamer, but do enjoy mobile gaming especially with car racing games (think Asphalt, Real Racing, NFS). So I whipped out an android phone and increased performance levels to the max and let the phone go through its normal heating cycle while measuring temperature, battery life and keeping an eye on the frames. I repeated the above process with the OnePlus cooler attached. Results were astounding, safe to say there was no heating, minimal battery drain and a full frame rate gaming experience with the cooler attached. A must buy device for mobile game enthusiasts. ## Zunpulse Plug Pro

Very often we overlook our plug points while setting up homes and offices. But a good plug/source will enable longevity for your devices. Zunpulse has a Wifi enabled IoT plug which allows a max current of 16 amps. The plug connects easily to the Zunpulse app for setup and you can monitor energy levels, set schedules for on/off, control devices plugged in remotely and monitor 24x7 as well. Thanks to Alexa and Google, I could switch on my AC from elsewhere and switch off my geyser. Such smart plugs can be effectively used to control devices like motors, lights and security devices remotely. [zunpulse.com](https://www.zunpulse.com)

## Timex Helix Metafit 3.0

Helix Metafit 3.0 comes from the Timex Group and promises style as well as serious fitness attributes. On unboxing, the watch itself is elegant, slim, light and classy with an excellent silicone strap to boot. Setup is easy and the watch syncs with the Timex Helix app. The best features include accurate SpO2 tracking, a solid metal case, multiple sports modes to cater to every individual and 24x7 Heart rate monitoring. The 1.69" display is big, bold and fits like a glove on my wrist. I also appreciated the battery longevity lasting eight plus days on a single charge. The stylish watch comes in four colour variants and co-ordinated straps. [helix-watches.com](https://www.helix-watches.com)

## Google Pixel watch

Google's Pixel series now adds a smartwatch to its portfolio. With Fitbit tech added, the Pixel watch is a formidable force connected to Wear OS: it not only tracks activity, sleep and heart rate, but also integrates with Google Maps for slick navigation, Wallet for payments, Assistant for Voice instructions, Mail, Music and so on.
